Exploring new places | Listen Podcasts |
Reading Books | Badminton

📇 PROFESSIONAL SUMMARY

Experienced Full Stack Developer proficient in JavaScript, MERN stack (MongoDB, Express.js, React.js, Node.js). Skilled in designing and developing functional web applications, creating efficient server-side APIs, and integrating frontend and backend components. Strong problem-solving abilities, attention to detail, and a proactive attitude. Excellent collaborator with effective communication skills for seamless teamwork.

🖥️ PROJECTS

1. Befit-application | ⊕ | ○
HTML5 | CSS3 | Responsive Web Design | Firebase | Express.js | RESTful APIs | Chakra UI | Redux | Git | React | JavaScript

- Led a team of four in the development of a comprehensive health and wellness application, ensuring seamless collaboration and task distribution.
- Designed and implemented the nutrition and physical activity tracking components using React.js and Redux.
- Utilized Firebase for real-time database management and user authentication to enhance the application's functionality.

2. The New York Times | ⊕ | ○
JavaScript | HTML5 | CSS3 | RESTful APIs | Git

- Collaborated with team members to integrate RESTful APIs for dynamic data rendering and functionality.
- Utilized HTML5, CSS3, and JavaScript to create responsive and interactive UI components.
- Managed version control and collaborative development using Git for efficient workflow.
- Contributed to optimizing the frontend to ensure seamless user experience and smooth performance.

3. Clone of Casio Website | ⊕ | ○
bootstrap | Tailwind | figma | HTML5 | Responsive Web Design | RESTful APIs | Git | Sass | CSS3

- Designed and implemented the footer section using Bootstrap framework to ensure a consistent and responsive design.
- Collaborated with team members to integrate RESTful APIs for fetching and displaying watch details.

🛍️ WORK EXPERIENCE

private organization
Teaching
January 2020 – January
Job responsibilities:
